**ORDER:-**

In the reference read above, the Engineer-in-Chief (R&B) State Roads, Hyderabad has stated that Neredcherla – Janpad road is an important major district road having a length of 25.0 Kms it connects Miryalguda – kodad road and number of interior roads. This road is passing through several major villages i.e., Neredcherla, Narsaigudem, Dirshencherla, Gudugundlapalem, Palakeedu, Janpad and Mahankaligudem villages and also Miryalguda constituency villages connecting to this road. The density of traffic on this road is high, as the entire reach passes through wet fields. The villagers bring their agricultural produce to the production factories which are laid on either side of road due to which heavy loaded vehicles are transporting with their goods continuously on this single lane road caused damage to BT and interruption to traffic. Hence there is need for widening the road and culverts from single lane to double lane for transportation of the agricultural goods and cement produce for commercial and non commercial vehicles which ply on this road. As the traffic is increasing day by day, it is essential to widen the existing carriageway from 3.66m to 7.0m wide to ease the traffic flow on this road. The traffic intensity on this road is 934 PCUs / day and traffic intensity is 11051 T/day. He has certified that the Stage –I approval is not required as detailed investigation is completed and designs are finalized. No land acquisition and shifting of utilities are required for taking up the subject work without interruption.
